Artificial Sweeteners

Artificial sweeteners are high-intensity sugar substitutes that provide sweetness with little or no calories. They are widely used to reduce sugar content while maintaining the desired taste, making them an ideal choice for low-calorie, sugar-free, and diabetic-friendly products.

Benefits

- ❖ ***High sweetness intensity with low usage levels***
- ❖ ***Low or zero calorie contribution***
- ❖ ***Helps reduce overall sugar content***
- ❖ ***Suitable for diabetic-friendly formulations***
- ❖ ***Excellent stability and long shelf life***
- ❖ ***Cost - effective for industrial applications***

GAEFA™

CLEAR & SIMPLIFIED INGREDIENTS.

Applications

- Bakery products
- Dairy products
- Beverages Carbonated and non-carbonated
- Confectionery and chewing gum
- Desserts and ice creams
- Pharmaceutical syrups, tablets, and chewables
- Nutritional supplements and health products
- Processed foods and tabletop sweeteners

Artificial sweeteners help manufacturers create healthier, great-tasting products while meeting the growing consumer demand for reduced-sugar and sugar-free alternatives.
